COMP9900 Retrospective A

<u>Meal Recommendation System</u>

Team: Brainstorm

Lab: M18Q

Retrospective A Meeting date:

10 Oct, 2022

zID	Name	Position	Meeting Attendance
z5228748	Hanyue Jiang	Back-end	Present
z5319735	Shiyu Nie	Front-end	Present
z5295651	Zening Wang	Front-end	Present
z5298115	Han Yan	Front-end	Present
z5290496	Xueqing Ren	Back-end	Present

Submission date:

21 Oct, 2022

1. What went well

Aspect	Description
Team management	• Team member were divided into backend subgroup and frontend subgroup depending on members technology stack. • We hold at least one meeting every week, two subgroups monitor each other's progress.
Task assignment	• Task assignment per week is confirmed on group meeting, so every member is clear about his/her task in the following week. • Every team member is self-motivated and willing to undertake different tasks. • When team member is overwhelmed by other courses' assignment, other members are willing to share responsibility for the task.
Communication	• Created a WeChat group to share any thoughts about the project and raise any problems. • When some problems occur, team member can make response quickly. • When teammate have technical doubts, team members are willing to share related knowledge.
Codebase management	• Stored our codebase on GitHub
Project development	• Backend leads frontend, backend will provide API before frontend starts designing related web pages. • Completed all the user storied scheduled to be done in the first sprint

2. What did not go so well

Aspect	Description
Team management	• Did not make full use of Jira
Code optimization	• Page function needs to be further subdivided and improved
Project development	• Current database storage format of Recipe Ingredients is too simple and lack of specific template • The selection range of cooking methods is not formulated.

3. 'To try' list

Aspect	Description	Task assignment
Team management	● Update Jira board and add comments on time	Hanyue Jiang
Code optimization	● Improve the functional design of the page to match the subsequent pages to enhance the user experience	Nie shiyu Zening Wang Han Yan
Project development	● Redesign the database table of Recipe	Hanyue Jiang
Project development	● Finding a reasonable way to store ingredients in database to make the following search function easier to implement.	Xueqing Ren
